

# Hewlett Packard Enterprise

May 28, 2021

Greetings,

Prashant Kinagi has worked with my team on a project for Hewlett Packard Enterprise (HPE). The on-going project is the HPE SSD Selector Tool. This tool enables customers to make the proper decisions for Solid State Drive when purchasing HPE Servers.

Prashant's held the role for Quality Analyst Testing Engineering as a contingent worker with Bhilwara Info Technology Ltd. He has successfully completed his role and helped bring our team up to speed on requirements.

His extensive knowledge in JIRA, Selenium & Jenkins has greatly improved our Software Development Lifecycle. He was showing his experience with Automation and Manual Testing. His knowledge base on Microsoft Azure instance & deployment has also been a great value to the team. He was very proactive in Setting up our auto back up activity of the active servers.

Prashant is a great team member. He showcases "out of the box" thinking when it comes to tough situations. He has always kept the customer/users needs in mind and viewed scenarios from their perspective.

It was an honor to have Prashant on my team and help HPE bring this tool back to life. He is a great team player and has always helped when needed. I admired his willingness to learn and go-to positive attitude. His communication skills are immaculate amongst our team.

If you have any further questions or concerns, you can reach out to me via email, Lissette Cruz, [cruz@hpe.com](mailto:cruz@hpe.com)

Kindest Regards,

Lissette Cruz
